Invitation

You are cordially invited to participate in the 20th IUPAC Conference on Chemical Research Applied to World Needs (CHEMRAWN XX). The main objective of the Conference is to provide a global perspective on the future development of the many chemical, biological, botanical, and legal facets of herbal (traditional) medicine, as they relate to the accessibility of safe, efficacious and consistent supply of herbal medicines for the improvement of healthcare globally. Analytical and natural product chemistry, including metabolomics, will be significantly represented along with chemical and biological information system development, new technologies, efficacy-focused clinical trials, agroeconomics and sustainable development, intellectual property rights and patents, production, marketing, and synergistic integration with evolving government regulations.

Researchers from relevant disciplines; Herbal product manufacturers from abroad and Bangladesh; herbal practitioners from several regional countries; Government regulators from Europe, Bangladesh, India, USA, China, and Australia; a representative from the World Intellectual Property Organization (WIPO); a representative from WHO Office for Traditional Medicine; pharmaceutical manufacturers who also produce herbal medicine products; scientists (chemists, botanists, biologists, and clinicians) involved with quality control of herbal medicines; and Herbal medical academicians are expected to attend the meeting.

Weather in Bangladesh will be pleasant during November and we hope you will have a useful and memorable visit to Dhaka.
